

**Labels, printer and software
for watches & jewellery.**

Save time and gain success with
our labels and software.

with clarity to success.

Label printer & software

Label printer basic package (no stock control system required)

1. CLARITY & SUCCESS Barcode Software

This software is especially suitable for jewellers who do not use a stock control software but still do not want to do without professional labels. The software is also suitable for manufacturers of jewellery and wholesalers who cannot print professional labels with their own software system. They can thus easily produce the labels for a complete collection.

2. Label printer Intermec PF8T - (300 dpi)

Sturdy thermal transfer printer for ultrasonic/ultraviolet-resistant labels for jewellery. Prints fast and silent. It is easy to handle and a printing density of 300 DPI makes for an accurate and precise little barcode.

3. Cable

For connection with your PC.

4. Ink ribbon

In black for 30,000 tags.

5. Four label rolls of your choice included

The complete set for only £ 690

★ **Free software when buying 4 label rolls**
If you have already a label printer Intermec PC4 or PF8T with 300 dpi, you'll only need the labelling software. (Description see above, point 1).

Label printer basic package

£ 690

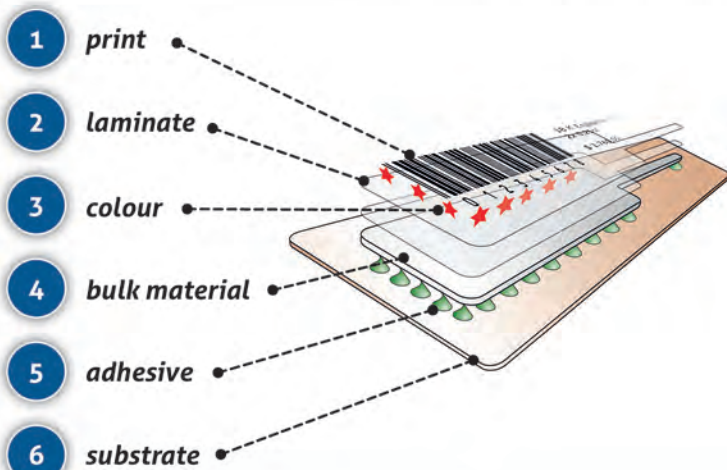

With our software you can print your logo, barcode and price in several fonts.

Example of print & design layout

(Shown in true size Type 3 with 28 mm loop)

The quality of our labels

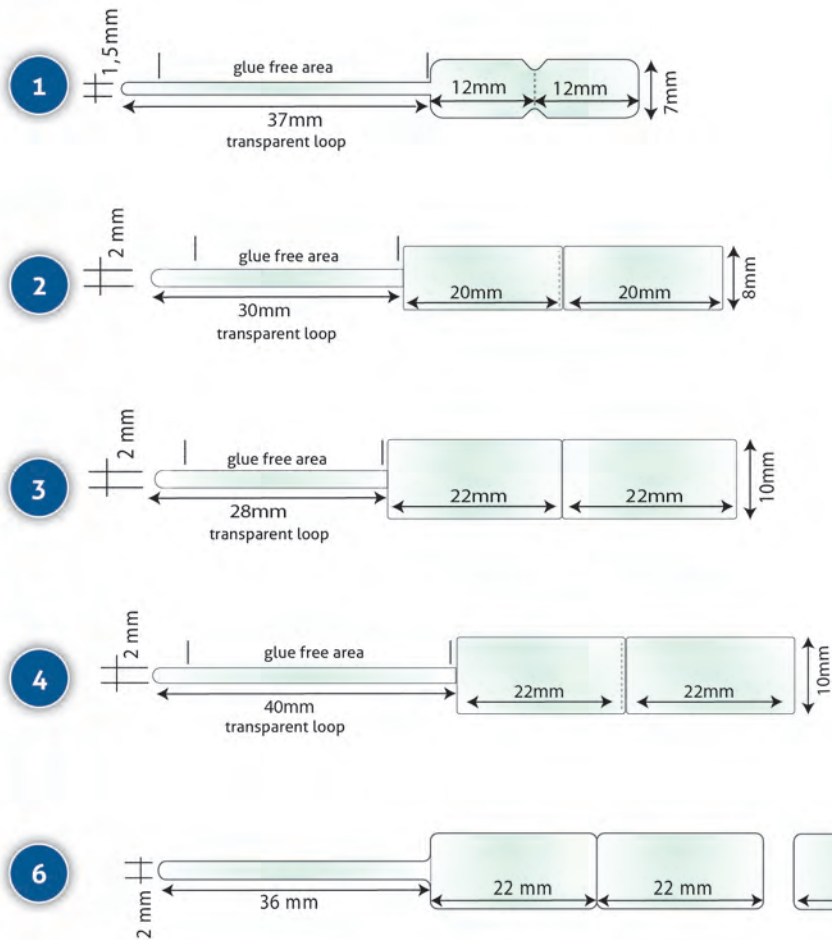

Our barcode labels make labelling your stock so easy!

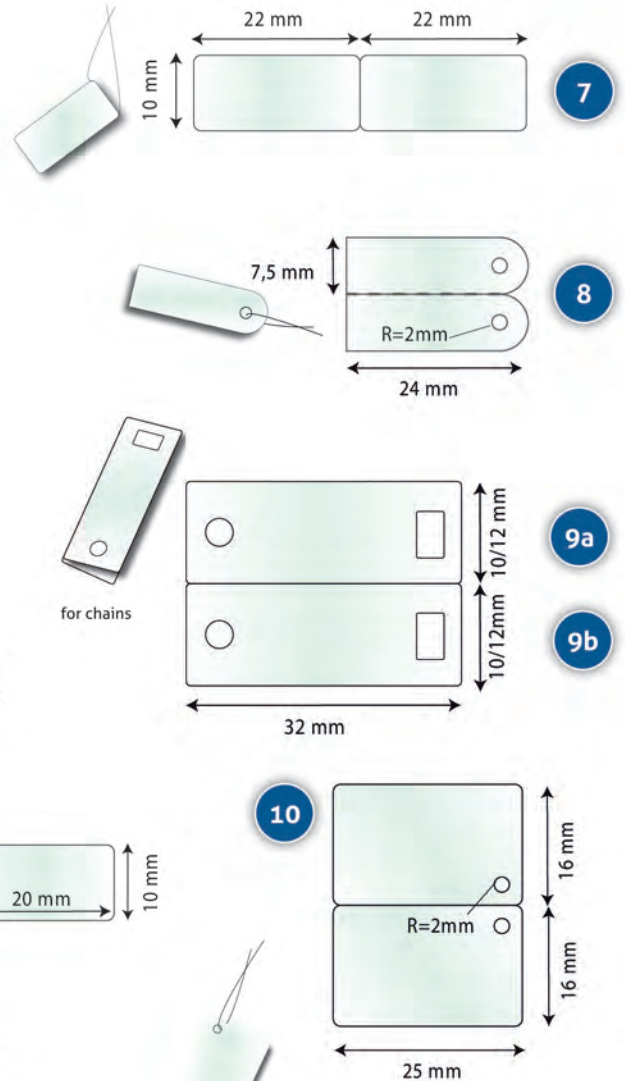

- Heat, UV and Ultrasonic resistant
- A glue free area prevents residue on your items
- The transparent loop makes fastening unobtrusive
- Barcodes spare recording article numbers
- Available colours - bright white, metallic gold, metallic silver
